	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	1 / 15

1. HOW TO USE THIS PLAN

In case of a disaster or in one of DATASSIST's offices, in case of any negativity that may affect the business, the responsible persons will coordinate the recovery of the business by using this plan. Information that may be required during business recovery is included in this plan. This plan does not cover the operations of DATASSIST's separately structured Emergency Response Team.

Index of Abbreviations: (BCP) Business Continuity Plan - (IT) Information Technologies

Part I, Introduction, contains a general description of the organization of the scheme. It also sets out the responsibilities for testing (exercise), training and maintenance activities necessary to ensure the ongoing continuity of the plan.

Part II, Business Continuity Strategy, describes the strategy that DATASSIST will control/implement to ensure business continuity in the event of a facility disruption. These decisions determine the content of the action plans and if they change at any time, the plans must be modified accordingly.

Section III, Recovery Teams, lists the Recovery Team functions, the people given specific responsibilities and procedures on how to inform each team member.

Section IV, Team Procedures, sets out what activities and tasks are to be undertaken to ensure rescue, in what order and by whom.

Section V, Appendices, contains all other information needed to carry out the plan.

Other sections refer the reader to one or more Annexes to find the information needed to perform the steps of the Team Procedures.

2. OBJECTIVES

The objective of the Business Continuity Plan is to coordinate recovery of critical business functions in managing and supporting the business recovery in the event of a facilities (office building) disruption or disaster. This can include short or long-term disasters or other disruptions, such as fires, floods, earthquakes, explosions, terrorism, tornadoes, extended power interruptions, hazardous chemical spills, and other natural or man-made disasters.

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

*** Electronic Copy is a document whose output is not controlled.*

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

 TECH DRIVEN PAYROLL & HR SERVICES	BUSINESS CONTINUITY PLAN (BCP)				
	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	2 / 15

A disaster is defined as any event that renders a business facility inoperable or unusable so that it interferes with the organization's ability to deliver essential business services.

The priorities in a disaster situation are to:

1. Ensure the safety of employees and visitors in the office buildings.
2. Mitigate threats or limit the damage that threats can cause.
3. Have advanced preparations to ensure that critical business functions can continue.
4. Have documented plans and procedures to ensure the quick, effective execution of recovery strategies for critical business functions.

The Business Continuity Plan includes procedures for all phases of recovery as defined in the Business Continuity Strategy section of this document.

Ensuring Business Continuity in Possible Earthquake Disaster;

Our data center, which maintains TIER 4 standards to prevent data loss, is located in Ankara, where the risk of earthquake is low. Due to its location, there is no possibility of data loss.

With the presence of our Eskişehir, Bursa, Samsun, Çanakkale branches, our remote and hybrid working system and the creation of backups within the teams, we have planned a system that will ensure business continuity and the operation of business functions after a possible earthquake disaster.

The Business Continuity Plan includes procedures for all stages of recovery in the Business Continuity Strategy section of this document.

3. SCOPE

The Business Continuity Plan is limited in scope to recovery and business continuance from a serious disruption in activities due to non-availability of DATASSIST's facilities. The Business Continuity Plan includes procedures for all phases of recovery as defined in the Business Continuity Strategy of this document. This plan is separate from DATASSIST's Disaster Recovery Plan, which focuses on the recovery of technology facilities and platforms, such as critical applications, databases, servers or other required technology infrastructure (see Assumption #1 below). Unless otherwise modified, this plan does not address temporary interruptions of duration less than the time frames determined to be critical to business operations.

The scope of this plan is focused on localized disasters such as fires, floods, and other localized natural or man-made disasters. This plan is not intended to cover major regional or

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

	PLN.10	10.10.19	14	06.08.26	3 / 15

national disasters such as regional earthquakes, war, or nuclear holocaust. However, it can provide some guidance in the event of such a large-scale disaster.

4. ASSUMPTIONS

The viability of this Business Continuity Plan is based on the following assumptions:

1. That a viable and tested IT Disaster Recovery Plan exists and will be put into operation to restore data center service at a backup site within five to seven days.
2. That the Organization's facilities management department has identified available space for relocation of departments which can be occupied and used normally within two to five days of a facilities emergency.
3. That this plan has been properly maintained and updated as required.
4. That each department has their own Business Continuity Plan.
5. The functions and roles referenced in this plan do not have to previously exist within an organization; they can be assigned to one or more individuals as new responsibilities, or delegated to an external third party if funding for such services can be arranged and allocated.

5. CHANGES TO THE PLAN/MAINTENANCE RESPONSIBILITIES

Maintenance of the Business Continuity Plan is the joint responsibility the Business Continuity Coordinator.

The Business Continuity Coordinator is responsible for:

1. Periodically reviewing the adequacy and appropriateness of its Business Continuity strategy.
2. Assessing the impact on the Business Continuity Plan of additions or changes to existing business functions, procedures, equipment, and facilities requirements.
3. Keeping recovery team personnel assignments current, taking into account promotions, transfers, and terminations.
4. Communicating all plan changes to the Business Continuity Coordinator so that the organization's IT master Disaster Recovery Plan can be updated.
5. Maintaining and/or monitoring offsite office space sufficient for critical functions and to meet the facility recovery time frames.
6. Communicating changes in the "Organization IT Disaster Recovery Plan" plan that would affect groups/departments to those groups/departments in a timely manner so they can make any necessary changes in their plan.
7. Communicating all plan changes to the Business Continuity Coordinator so that the master plan can be updated.

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

*** Electronic Copy is a document whose output is not controlled.*

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	4 / 15

8. Keeping the organization's IT Recovery Plan updated with changes made to facilities plans.
9. Coordinating changes among plans and communicating to management when other changes require them to update their plans.

6. PLAN TESTING PROCEDURES AND RESPONSIBILITIES

Business Continuity Coordinator management is responsible for ensuring the workability of their Business Continuity Plan. This should be periodically verified by active or passive testing.

7. PLAN TRAINING PROCEDURES AND RESPONSIBILITIES

Business Continuity Coordinator is responsible for ensuring that the personnel who would carry out the Business Continuity Plan are sufficiently aware of the plan's details. This may be accomplished in a number of ways including; practice exercises, participation in tests, and awareness programs conducted by the Business Continuity Coordinator.

8. BUSINESS CONTINUITY STRATEGY

A. INTRODUCTION

This section of the Business Continuity Plan describes the strategy devised to maintain business continuity in the event of a facilities disruption. This strategy would be invoked should DATASSIST primary facility somehow be damaged or inaccessible.

It is assumed that each critical business function at your location also has their own group/department Business Continuity Plan, which is similar to this plan except the recovery procedures and appendices have been customized for each respective group/department based on size, and complexity.

B. BUSINESS FUNCTION RECOVERY PRIORITIES

The strategy is to recover critical business functions at the alternate site location. This can be possible if an offsite strategy has been put into effect by Office Services and Disaster Recovery/IT Teams to provide the recovery service. Information Systems will recover IT functions based on the critical departmental business functions and defined strategies.

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

*** Electronic Copy is a document whose output is not controlled.*

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

	BUSINESS CONTINUITY PLAN (BCP)				
	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	5 / 15

Business Functions by Location are listed in Appendix B (Recovery Priorities for Critical Business Functions). “Time Critical Business Functions,” i.e., those of which are of the most critical for immediate recovery at the secondary location are:

Reference: Appendix B – Recovery Priorities for Critical Business Functions

C. RELOCATION STRATEGY AND ALTERNATE BUSINESS SITE

In the event of a disaster or disruption to the office facilities, the strategy is to recover operations by relocating to an alternate business site. The short-term strategies (for disruptions lasting two weeks or less), which have been selected, include working from home.

For all locations, if a long-term disruption occurs (i.e. major building destruction, etc.); the above strategies will be used in the short-term (less than two weeks). The long-term strategies will be to acquire/lease and equip new office space in another building in the same metropolitan area.

D. RECOVERY PLAN PHASES

The activities necessary to protect DATASSIST’s facilities from disasters or failures are divided into four stages. These stages follow one another sequentially.

Within the scope of this plan, the established recovery objectives are as follows:

- **RPO (Recovery Point Objective):** 0 – Recovery of systems without any data loss.
- **RTO (Recovery Time Objective):** 2 hours 15 minutes – The time required to bring critical systems back online.

These objectives are regularly validated through business continuity and disaster recovery tests.

1. Disaster Occurrence

This phase begins with the occurrence of the disaster event and continues until a decision is made to activate the recovery plans. The major activities that take place in this phase includes: emergency response measures, notification of management, damage assessment activities, and declaration of the disaster.

* Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.

** Electronic Copy is a document whose output is not controlled.

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

 TECH DRIVEN PAYROLL & HR SERVICES	BUSINESS CONTINUITY PLAN (BCP)				
	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	6 / 15

2. Plan Activation

In this phase, the Business Continuity Plans are put into effect. This phase continues until the alternate facility is occupied, critical business functions reestablished, and computer system service restored. The major activities in this phase include: notification and assembly of the recovery teams, implementation of interim procedures, and relocation to the secondary facility/backup site, and re-establishment of data communications.

3. Alternate Site Operations

This phase begins after secondary facility operations are established and continues until the primary facility is restored. The primary recovery activities during this phase are backlog reduction and alternate facility processing procedures.

4. Transition to Primary Site

This phase consists of any and all activities necessary to make the transition back to a primary facility location.

E. VITAL RECORDS BACKUP

All vital records for that would be affected by a facilities disruption are maintained and controlled by Disaster Recovery/IT. Some of these files are periodically backed up and stored at an offsite location as part of normal operations.

When departments require on-site file rooms, scanning, and organization offsite storage locations, best practices advise using one near-by Records Warehouse and another secure site for vital records and data back-up. All vital documents are typically located in files within the office complex and the most current back-up copies are in a secure off-site storage facility.

F. RESTORATION OF HARDCOPY FILES, FORMS, AND SUPPLIES

In the event of a facilities disruption, critical records located may be destroyed or inaccessible. In this case, the last backup of critical records in the secure warehouse would be transported to the secondary facility. The amount of critical records, which would have to be reconstructed, will depend on when the last shipment of critical records to the offsite storage location occurred.

IT management will arrange the frequency of rotation of critical records to the offsite storage site.

The following categories of information can be exposed to loss:

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

*** Electronic Copy is a document whose output is not controlled.*

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

	BUSINESS CONTINUITY PLAN (BCP)				
	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	7 / 15

1. Any files stored on-site in file cabinets and control file rooms.
2. Information stored on local PC hard drives.
3. Any work in progress.
4. Received and un-opened mail.
5. Documents in offices, work cubes and files.
6. Off-site records stored in the Records Warehouse (if this is not a secure, hardened facility).

G. ON-LINE ACCESS TO COMPUTER SYSTEMS

In the event of a facilities disruption, the IT Disaster Recovery Plan strategy should be to assist in re-establishing connectivity to the departments and to establish remote communications to any alternate business site location. If the data center is affected by a disaster or disruption, the IT Disaster Recovery Plan should include recovering processing at a pre-determined alternate site. Services covered would include; phones, cellular phones, pagers, communications, and all other services required for restoring limited emergency service to the organization.

In this case, data communications will be rerouted from the data processing hot or cold site to the respective alternate business site locations.

H. MAIL AND REPORT DISTRIBUTION

During the time that department operations are run from the secondary facilities, output reports and forms will have to be delivered to that location. The data center may or may not have the same print capability if the disruption affected the data center as well, so it may be necessary to prioritize printing of output.

I. HARDWARE/SOFTWARE/DATA TRANSFER POLICY AND AUTHORIZATION

In the event of a disaster or planned maintenance, the process of transferring or moving hardware, software, or data to an alternative location is carried out in accordance with the organization's Information Security Policies and Business Continuity Strategy.

- Transportation or transfer operations are initiated only with written or cryptographically verified authorized approval.
- The approval process is carried out and recorded by the relevant senior manager (e.g., IT Director/Information Security Manager).

* Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.

** Electronic Copy is a document whose output is not controlled.

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	8 / 15

- During physical transportation, the security of hardware and environments is ensured; data integrity is protected, and access control measures are applied.
- In transportation activities carried out in coordination with the service provider, responsibilities and security measures are applied as defined in the relevant contracts.
- These policies and procedures are reviewed at least once a year, verified through tests and drills, and updated as necessary.

9. RECOVERY TEAMS

A. Purpose and Objective

This section of the plan identifies who will participate in the recovery process for the Business Continuity Plan. The participants are organized into one or more teams. Each team has a designated team leader and an alternate for that person. Other team members are assigned either to specific responsibilities or as team members to carry out tasks as needed.

The information in this section is organized into several subsections.

B. Recovery Team Descriptions

This section lists the team definitions and gives a short explanation of the function of each team or function.

Datassist Recovery Team: Responsible for oversight of the recovery functions.

C. Recovery Team Assignments

This section identifies the team roles and the specific responsibilities that have been assigned to the team.

Team leader - Overall coordination of Recovery Team

Backup Team Leader - Duties to be assigned based on Recovery Team areas of responsibility.

Team Member - Duties to be assigned based on Recovery Team areas of responsibility

D. Team Contacts

This section identifies other people or organizations outside of the Team who might need to be contacted during the recovery process. Their names and telephone numbers are provided.

Reference: Appendix A – Employee Telephone Lists

	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	10 / 15

10. BUSINESS CONTINUITY COORDINATOR

Umut Özbağcı General Management / CEO

In the event of a disaster, the Business Continuity Coordinator is responsible for ensuring that the following activities are successfully completed:

- Works with the Datassist Recovery Team to officially declare a disaster, and start the Disaster Recovery/Business Continuation process to recover Datassist's business functions at an alternate site.
- Alert Datassist's Senior Management that a disaster has been declared.
- Assist in the development of an official public statement concerning the disaster.
- Monitor the progress of all Business Continuity and Disaster Recovery teams daily.
- Present Business Continuity Plan recovery status reports to Senior Management on a daily basis.
- Interface with appropriate work management personnel throughout the recovery process.
- Communicate directions received from Datassist's Senior Management to the EOC and Departmental Business Continuity Team Leaders.
- Provide on-going support and guidance to the Business Continuity teams and personnel.
- Review staff availability and recommend alternate assignments, if necessary.
- Work with Datassist's Senior Management to authorize the use of the alternate recovery site selected for re-deploying critical Datassist resources.
- Review and report critical processing schedules and backlog work progress, daily.
- Ensure that a record of all Business Continuity and Disaster Recovery activity and expenses incurred by Datassist being maintained.

11. RECOVERY PROCEDURES

A. Purpose and Objective

This section of the plan describes the specific activities and tasks that are to be carried out in the recovery process. Given the Business Continuity Strategy, this section transforms those strategies into a very specific set of action activities and tasks according to recovery phase.

The Recovery Procedures are organized in the following order: recovery phase, activity within the phase, and task within the activity.

The recovery phases are described in Recovery Plan Phases of the Plan. In the Recovery Procedures document, the phases are listed in the order in which they will occur. The description for each recovery phase begins on a new page.

* Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.

** Electronic Copy is a document whose output is not controlled.

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

 TECH DRIVEN PAYROLL & HR SERVICES	BUSINESS CONTINUITY PLAN (BCP)				
	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	11 / 15

Each activity is assigned to one of the recovery teams. Each activity has a designated team member who has the primary assignment to complete the activity. Most activities also have an alternate team member assigned. The activities will only generally be performed in this sequence.

The finest level of detail in the Recovery Procedures is the task. All plan activities are completed by performing one or more tasks. The tasks are numbered sequentially within each activity, and this is generally the order in which they would be performed.

Transportation operations are carried out in accordance with the relevant procedures and are initiated only with authorized approval.

B. Rescue Activities and Tasks

PHASE I: DISASTER OCCURRENCE

ACTIVITY: Emergency Response and Emergency Operation Center Assignment

LOCATION: Main Office

RESPONSIBLE: Buğra Saltuk Aktürk

Alternate Responsible: Tolga Eligül

TASKS:

1. After a disaster occurs, quickly assess the situation to determine whether to evacuate the building immediately, depending on the nature of the disaster, the extent of damage and the potential for additional hazards.
2. Quickly assess whether any personnel in your vicinity are injured and in need of medical attention. If you cannot help them without causing them further harm or putting yourself in further danger, then determine what kind of assistance you can provide and apply for help. If there is further danger, evacuate the building immediately.
3. If necessary, evacuate the building in accordance with your building's emergency evacuation procedures. Use the nearest stairwells. Do not use the elevator.
4. Meet outside the building at the Park Café. Do not wander or leave the area unless asked to do so.
5. Check with your line manager for attendance. This is important to ensure that not all employees are missing.

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

*** Electronic Copy is a document whose output is not controlled.*

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

 TECH DRIVEN PAYROLL & HR SERVICES	BUSINESS CONTINUITY PLAN (BCP)				
	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	12 / 15

ACTIVITY: Management Briefing

LOCATION: Telephone

RESPONSIBLE: Buğra Saltuk Aktürk

Alternate Responsible: Tolga Eligül

DUTIES:

1. The team leader informs the management team members and notifies the senior management if they are not informed.
2. All staff are informed of the disaster.
3. Depending on the time of the disaster, staff are instructed on what to do (e.g. stay at home and wait to be informed again, etc.).

ACTIVITY: Preliminary Damage Assessment

LOCATION: Main Office

RESPONSIBLE: Alen Ege Erboğa

Alternate Responsible: Müge Gürses

TASKS:

1. Liaise with the Team Leader to identify responsibilities and tasks to be performed by the team or employees.
2. If the team requests assistance in carrying out the Preliminary Damage Assessment, warn all personnel to avoid security risks as follows:
 - Enter only authorized areas.
 - Ensure that all electrical power supplies to any area or equipment that may pose a personal safety threat are cut off.
 - Ensure that under no circumstances is there power to be restored to the computer equipment until comprehensive damage assessment has been carried out, inspected and clearly indicated by the Team authorized to re-connect.
3. Inform all team members that no changes to facilities or equipment can be made until Risk Management representatives (this is a function provided as a statewide service by the Ministry of Central Services) have made a comprehensive assessment of damage management and issued their letter. Agreement that repairs can begin.

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

*** Electronic Copy is a document whose output is not controlled.*

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

 TECH DRIVEN PAYROLL & HR SERVICES	BUSINESS CONTINUITY PLAN (BCP)				
	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	13 / 15

4. Ask the Team Leader to submit the preliminary damage assessment status report immediately upon completion.
5. Facilitate the retrieval of items (contents of filing cabinets - petty cash, security codes, network backup tapes, control books, etc.) needed to assess the preliminary damage.
6. Ensure that administrative support is available as required.
7. Organize a meeting at your facility (on-site) with the Team and other GROUPS/DIVISIONS to review the disaster declaration recommendation resulting from the preliminary damage assessment to determine the course of action to be taken. With this group, finalize the strategy to advise Senior Management.

ACTIVITY: Disaster Declaration

LOCATION: Main Office

RESPONSIBLE: Tuğçe Kulaksız

Alternate Responsible: Müge Gürses

DUTIES:

1. The actual declaration of a disaster is made by the Team, after consultation with senior management. The Team should wait for notification from the Emergency Management Team that a disaster has been declared and that groups/departments will start implementing Business Continuity Plans.
2. The contact person verifies that the caller is a person authorized to make the notification.
3. The contact person notifies Senior Management if not yet contacted.
4. If the team cannot be assembled or cannot be reached, the Team Leaders of each Team in the region should meet, gather the appropriate information, consult with senior managers and decide whether to declare a disaster.
5. Due to the importance, disruption and cost of declaring a disaster, appropriate data should be collected and considered before deciding to declare a disaster. Individual groups/departamental staff or respective Teams should not unilaterally decide to declare a disaster. This is the responsibility of the Team.

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

*** Electronic Copy is a document whose output is not controlled.*

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	14 / 15

PHASE II PLAN ACTIVATION

ACTIVITY: Informing and Establishing Teams and Workers

LOCATION: Residence

RESPONSIBLE: Alen Ege Erboğa

Alternate Responsible: Müge Gürses

TASKS:

1. Team leader calls each member of the management team, tells them when to work from home and to bring copies of the Plan.
2. Review the recovery strategy and action plan with the assembled team.
3. If necessary, adjusts management team tasks depending on which members are available.
4. Team contacts critical workers and tells them to work from home.

ACTIVITY: Implementation of Temporary Procedures

LOCATION: Residence

RESPONSIBLE: Mehmet Göksel Gün

Alternate Responsible: Yağmur Teke

DUTIES:

1. Establish flexible work schedules to ensure that customer and business needs are met and also for efficient use of space. This may require some employees to work staggered shifts or evening/night shifts may be required.
2. Collect vital records and other materials from the primary site and identify appropriate storage areas, taking into account the effectiveness of work groups.

ACTIVITY: Restore Data Processing and Data Communication with Primary or Secondary Backup Data Center

LOCATION: DRP Facility

RESPONSIBLE: Mine İşçi

Alternate Responsible: Recep Kement

** Documents that all company employees can see, but should not be seen by people outside the company, are included in this class.*

*** Electronic Copy is a document whose output is not controlled.*

This document, from the moment it is printed, is for information only unless it is stamped or initialed.

	Document Code	Release Date	Revision No	Revision Date	Page No
	PLN.10	10.10.19	14	06.08.26	15 / 15

TASKS:

1. Contact the Organization Disaster Recovery / IT Team to determine when the data center will be recovered if affected by the disaster. Also discuss when data communication will be established between the primary or secondary backup data center and your alternate site.
2. Discuss with the Disaster Recovery / IT Team when files on your regular PC / LAN servers and applications are restored and how you can access those files.
3. Discuss with the Disaster Recovery / IT Team your normal application report deployments, such as when you can receive standard computer reports and how to distribute them to your alternate site.
4. Communicate the IT recovery status to all staff who regularly use the systems.
